

Soundivine *THE BOTTLE* - Mobile wireless speaker

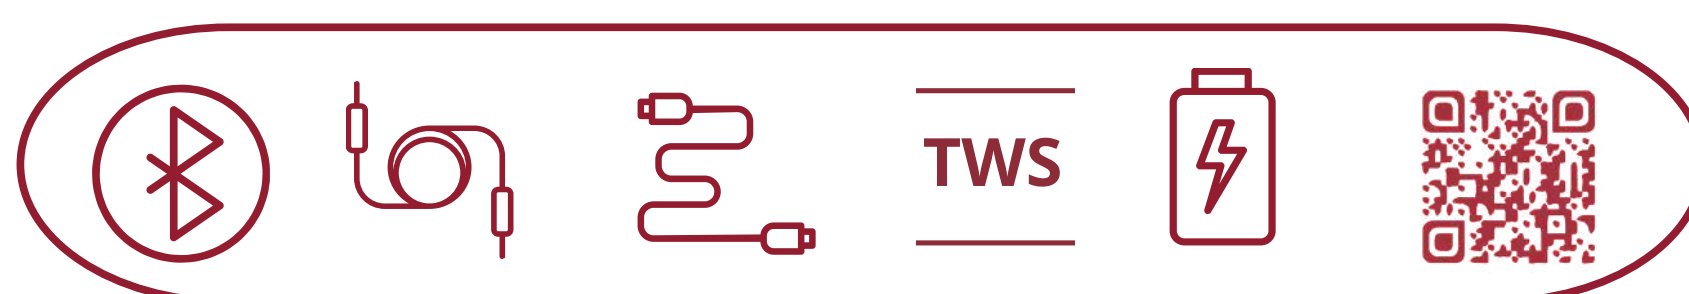

Guided by their experience in Sound Design & Music Production for more than 30 years, the Soundivine creators, assisted by an engineering house, have designed a speaker of remarkable acoustic quality with a clear and accurate sound.

The Bottle of Soundivine is a Bluetooth speaker playing with codes & materials. Smaller than The Magnum but with the same strength, this mobile speaker is in bottle format and will integrate in all decorations. The enclosure is in a solid beech tree. The novelty of this version is that two speakers can be paired in stereophonic mode.

The requirement of a clean and linear sound, covering the whole audio spectrum with flat response allows an optimal listening.

The Bottle is customised for our Foundation **Borneo Wildlife Preservation**; so for each purchase, you make a donation of the entire profit for the preservation of Bornean Island elephants!

Solid, aesthetic, heavy duty... this mobile speaker is versatile and very easy to use.

- Active closed load type speaker
- Bluetooth 5.0 and auxiliary input jack 3.5mm
- Amplification 2x25W Class D working on AC supply or battery
- USB 2.0 port 5V/1000mA to charge a smartphone or tablet
- Integrated DSP
- Li-ion battery 14.8V/2200mA autonomy 12 hours
- Power supply : 21V/4A AC100-240V/50-60Hz auto-sensing
- Bandwidth of speaker : 70Hz to 22KHz at +/- 3dB
- Speaker sensitivity : 87db at 2,83V/m

- Harmonic distortion < 0,1% (5W/1KHz)
- TWS mode (True Wireless Stereo)
- Format audio : MP2, MP3, WMA, APE, FLAC, AAC, MP4, M4A, WAV (IMA-ADPCM & PCM), AIF, AIFC
- Transmission > 10m
- Sampling rate : 44,1 KHz / 16 bits
- Dimensions : 330x110x125mm
- Dimensions with packaging : 450x190x190mm
- Weight net : 3.1 Kg
